

EDUGENIE

Google Gemini Powered Learning Assistant

8. Project Demonstration

Demonstration Setup

- Start the FastAPI application with Uvicorn.
- Open the application in a web browser at <http://127.0.0.1:8000>.
- Use the task dropdown and text input to demonstrate each learning feature.

Demo 1 – Asking Questions

- Select the QnA task.
- Enter an educational question.
- Submit the request and show the generated answer.

Demo 2 – Explaining a Topic

- Select Explain.
- Enter a topic that may be difficult for a learner.
- Submit the request and show the simplified explanation.

Demo 3 – Summarizing Content

- Select Summary.
- Paste a longer educational passage.
- Submit the request and show the concise revision-oriented result.

Demo 4 – Generating a Quiz

- Select Quiz.
- Provide a passage or topic.
- Show the generated three-question MCQ set with four options per question.

Demo 5 – Learning Recommendations

- Select Recommend Path.
- Enter a subject such as SQL.
- Show the structured progression from beginner to advanced topics and suggested resources.

Demonstration Conclusion

- The demonstration shows how EduGenie combines a simple web interface, FastAPI backend, and generative AI services to support interactive learning.
- The documented project envisions further expansion into voice, multilingual, mobile, analytics, gamification, collaboration, and multimedia learning features.
